EXECUTIVE SUMMARY

Full-Stack Developer & Technical Lead with **5+ years** of hands-on expertise engineering scalable production systems across **Laravel/PHP**, **Node.js**, **React**, **MERN**, **AWS Cloud**, and **AI/RAG architectures**. Currently directing full-stack operations, leading cross-functional engineering squads, and managing a multi-domain fleet of **200+ Laravel production websites**. Proven track record delivering high-concurrency SaaS suites, real-time IoT telematics, multi-provider GDS travel portals, automated fintech printing, and double-entry cargo ERPs.

CORE TECHNICAL SKILLS

Backend & Architecture:	Laravel, PHP (5+ yrs), Node.js, Express.js, RESTful APIs, WebSockets (Socket.io), C#, Python, Background Queue Workers, Microservices
Frontend & Mobile:	React.js, Next.js, Livewire, Alpine.js, Tailwind CSS, Bootstrap, JavaScript (ES6+), HTML5, Flutter (Cross-Platform Mobile)
Databases & Cloud:	MySQL, MongoDB, Redis, Apache Kafka, AWS (EC2, S3, Lambda, CloudFront, RDS), Cloudflare (WAF/CDN/DNS), Linux VPS, cPanel, Docker
AI & Automation:	LLM Integrations (OpenAI/Claude), RAG Pipelines, Vector DBs, n8n Workflow Automations, Third-Party GDS/Payment Gateways (QPay, N-Genius)

PROFESSIONAL EXPERIENCE

Full-Stack Developer · Team Lead · Technical Lead
WayWeGaming | Apr 2026 – Present

- Lead engineering operations across Laravel, MERN, and AI systems with CTO-level architectural ownership.
- Orchestrate a multi-domain fleet of **200+ Laravel production websites**: automated deployments, Cloudflare caching, DNS routing, and technical SEO.
- Architected internal SEO Content Placement Dashboard and complete enterprise HRM platform for operational workforce management.
- Built production AI applications, enterprise RAG knowledge-retrieval pipelines, and automated n8n business orchestration workflows.
- Mentor and guide engineering, SEO, and content writing teams; conduct sprint planning, code reviews, and live production security checks.

Backend Developer · Team Lead
Sigma Digital Solutions | Apr 2025 – Apr 2026

- Architected high-impact commercial web systems: **Al Mulla Travels** (Travelport/TBO GDS flight & hotel booking), **TechnoCheck** (fintech cheque printing & school ERP), and **Meryal Waterpark** (Next.js/Flutter ticketing platform).
- Led developer squad through task estimation, database schema design, REST API specifications, and rigorous PR reviews.
- Configured Linux VPS hosting, cPanel environments, automated database backups, and SSL/WAF infrastructure.

Senior Backend Developer
Zimo Group (UK) | Jul 2022 – Feb 2024

- **ZiTransfer:** Developed WeTransfer-style cloud transfer platform with direct AWS S3 presigned multipart chunked uploads, Lambda workers, and CloudFront edge delivery.
- **ZimoMeet:** Engineered low-latency enterprise video conferencing suite integrating Laravel API, Next.js, and Jitsi Meet WebRTC on AWS EC2.
- **ZimoPro:** Built real-time luxury auction bidding engine with anti-sniping countdown algorithms, Redis queues, and transactional locks.

Full-Stack Developer · Earlier Roles
DevThrone & Tech Falcon | Nov 2021 – Apr 2025

- Built full-stack client applications including Zaman Cargo (double-entry freight ledger ERP), SimpleFixx (handyman marketplace), BoxTech (IoT tracking), and LeadExchange (dual-wallet lead trading).

SELECTED PRODUCTION SYSTEMS HIGHLIGHTS

- **Al Mulla Travels:** Travelport & TBO GDS API integration, N-Genius payment gateway, vendor portal, and Flutter mobile app.
- **BoxTech:** IoT telematics platform streaming live GPS and device metrics via Apache Kafka, Flespi API, C#, and OpenStreetMap.
- **ZiTransfer:** Enterprise file transfer platform handling gigabyte files via direct S3 chunked uploads, Lambda, and CloudFront.
- **Zaman Cargo ERP:** Complete double-entry cargo accounting engine with client ledgers, invoices, vouchers, and payroll.

EDUCATION

Bachelor of Science in Computer Science (BSCS) · Allama Iqbal Open University — Sep 2019 – Jun 2023

Intermediate in Computer Science (ICS) · Rawalpindi College of Commerce — Sep 2017 – Jun 2019
