PROFESSIONAL SUMMARY

Full-Stack Developer and Technical Lead with **5 years of professional software development experience** across Laravel/PHP, Node.js/Express, React/MERN, AWS, DevOps, SaaS platforms, CRM/HRM systems, AI integrations, and production infrastructure.

Experienced in developing applications from **architecture and database design through backend development, REST APIs, frontend implementation, third-party integrations, deployment, server management, optimization, and production support**.

Currently working in a broad technical leadership role involving full-stack development, team management, DevOps, infrastructure, SEO technology, content operations, SaaS development, and AI/RAG systems.

Experienced in managing large multi-domain website portfolios, including approximately **200+ Laravel-based websites**, while coordinating development, SEO, content-writing, and design teams.

Project experience spans **gaming, HRM, SaaS, CRM, travel, banking-related systems, logistics, event management, education, e-commerce, lead marketplaces, music collaboration, file transfer, online meetings, luxury bidding, water parks, solar installation, healthcare, and business-management systems**.

CORE COMPETENCIES

- Full-Stack Web Development
- Technical Leadership
- Team Management & Mentoring
- Laravel / PHP
- Node.js / Express.js
- React.js / MERN

- REST API Development
- SaaS Architecture
- CRM / HRM Systems
- AWS Cloud
- VPS / cPanel / Cloudflare
- DevOps & Deployment
- Database Architecture
- MySQL / MongoDB
- WebSockets / Pusher
- Queue & Background Jobs
- AI / LLM Integrations
- RAG Systems
- n8n Automation
- Third-Party API Integration
- Geolocation Systems
- File Storage & AWS S3
- Technical SEO
- Multi-Domain Website Management
- Code Review & Technical Mentoring

TECHNICAL SKILLS

Languages

PHP, JavaScript, HTML5, CSS3, Js

Backend

Laravel, CodeIgniter, Node.js, Express.js, Livewire, REST APIs, WebSockets, Pusher, Queue Jobs

Frontend

React.js, Next.js, JavaScript, jQuery, Bootstrap, Tailwind CSS, Material UI

Databases

MySQL, MongoDB, Firebase, AWS RDS

AWS / Cloud

EC2, S3, RDS, Lambda, AWS Email Services

DevOps / Infrastructure

VPS, cPanel, GoDaddy, Cloudflare, Docker, Linux Hosting, DNS, Deployment, Production Troubleshooting

Tools

Git, GitHub, npm, Postman

AI / Automation

LLM Integrations, RAG, n8n, Python AI Workflows, Knowledge Retrieval, AI-Assisted Business Processes

---

PROFESSIONAL EXPERIENCE

WAYWEGAMING

Full-Stack Developer | Team Lead | Technical Lead

CTO-Level Technical Responsibilities | Apr 2026 – Present

- Lead full-stack development across Laravel, MERN, Python, SaaS, AI, and business-management applications.
- Built a complete **HRM system** for internal HR and operational management.
- Develop and maintain gaming websites and platforms using the **MERN stack**.
- Handle frontend, backend, APIs, databases, integrations, and deployment.
- Develop service-based company websites and platforms using Laravel.
- Manage approximately **200+ domain-based websites**, including development, deployment, maintenance, and optimization.
- Perform technical SEO and website optimization across multi-domain websites.
- Developed an internal **SEO Content Placement Dashboard** for content placement and SEO operations.
- Lead development, SEO, content-writing, and design teams.
- Assign tasks, monitor progress, perform code reviews, conduct live code checks, and provide technical direction.
- Work on SaaS-based systems using Laravel, MERN, and Python.
- Work on AI/LLM applications, RAG systems, knowledge-retrieval workflows, and AI-assisted business processes.
- Design and manage n8n automation workflows.
- Participate in architecture, technology selection, infrastructure planning, and technical delivery.
- Manage VPS, GoDaddy hosting, domains, DNS, Cloudflare, deployments, caching, and production environments.
- Handle production troubleshooting, performance optimization, security, and infrastructure maintenance.

SIGMA DIGITAL SOLUTIONS

Backend Developer | Team Lead

Apr 2025 – Apr 2026

- Developed full-stack business applications using Laravel, Node.js, React, databases, and APIs.
- Led developers through task assignment, code reviews, technical guidance, and implementation support.
- Developed travel, banking-related, water-park, CRM, and business-management platforms.
- Managed VPS, hosting, cPanel, deployments, and DevOps responsibilities.
- Supported architecture, database design, API development, debugging, optimization, and production deployment.

Selected Projects

Allmulla — Travel-based platform/business system.

Techno Bank — Banking-related business system.

Check — Banking/financial-related business system.

Meryal Water Park — Water-park business platform/system.

CRM Systems — Customer management, workflows, dashboards, administration, reporting, and business operations.

DEVTHRONE

Project-Based Full-Stack Developer

Mar 2024 – Apr 2025

- Developed client and business applications using Laravel, Node.js, React, databases, and APIs.
- Developed backend systems, CRM applications, dashboards, integrations, and business workflows.
- Handled deployment, hosting, server configuration, troubleshooting, and production maintenance.
- Worked across multiple client products and technology stacks.
- Delivered applications from development through deployment and ongoing maintenance.

ZIMO GROUP

Senior Backend Developer

Jul 2022 – Feb 2024

Worked on multiple company products with responsibility for backend development, APIs, databases, architecture, security, performance, and production support.

Responsibilities

- Developed Laravel/PHP backend systems and APIs.

- Designed database structures and application architecture.
- Implemented business logic and application workflows.
- Worked on security and application-level protections.
- Optimized application and database performance.
- Debugged production issues and improved code quality.
- Supported project planning and architecture decisions.
- Worked with frontend teams through API-driven application development.
- Supported technical SEO and search-engine registration.

Key Products

ZimoMeet — Online Meeting Platform

- Backend development and business logic.
- API development and application workflows.

Zimo.Team — Team & Application Management

- Backend development for team and application management.
- Business workflows and APIs.

ZiTransfer — File Transfer Platform

- Developed a WeTransfer-style file transfer system.
- Laravel backend development.
- AWS S3 integration.
- File upload, storage, management, and sharing workflows.

ZimoPro — Luxury Goods Bidding Platform

- Backend development for luxury-goods bidding.
- Business logic, application workflows, APIs, and database functionality.

TECH FALCON

JavaScript Developer / Intern → Developer

Nov 2021 – Jun 2022

- Started as an intern and progressed into professional development.
- Worked with JavaScript, PHP, and web applications.
- Developed frontend and backend functionality.
- Implemented project requirements and application enhancements.
- Fixed bugs and maintained existing applications.

SELECTED PROJECT PORTFOLIO

LOST AND FOUND

React + Laravel

Full-stack lost-and-found platform designed to help users recover lost items.

- Users can post lost and found items.
- Supports descriptions and image uploads.
- Includes intelligent matching between related lost/found posts.
- Includes user-to-user chat functionality.
- Includes a credit system for appreciating users who help recover items.
- Demonstrates full-stack React and Laravel development.

DIDAWAR

PHP • MySQL • HTML • CSS • JavaScript

Event and venue management platform.

- Venue and event-space listings.
- Users can browse available venues.
- Venue descriptions and images.
- Booking functionality for specified durations.
- User-friendly booking workflow.
- Backend and database-driven management functionality.

ZELA IELTS

PHP • WordPress

Education and institute website for Zela Institute.

- Course information and listings.
- Course schedules.
- Online enrollment functionality.
- Content-management capabilities.
- Student-facing and administration-oriented workflows.

E-STUDIO

MERN • React.js

Music collaboration and artist platform.

- Artist registration.

- Music publishing and sharing.
- Virtual band rooms.
- Live collaboration between artists.
- Meeting functionality.
- Audio and text messaging.
- Chat-room communication.
- Collaborative music-project workflows.

TIFFIN

MERN • Next.js

Subscription-based tiffin/meal-service platform.

- User registration.
- Location-based service availability.
- Tiffin subscription functionality.
- Menu and dish management.
- Subscription-plan management.
- Admin management system.
- Localized service availability based on customer area.

LEAD SELLING

Laravel

Lead marketplace platform.

- Users can browse available leads.
- Lead purchasing functionality.
- Administrative lead management.
- Content and business-management functionality.
- Designed to support buying and selling of leads.

WIN WIN SOLUTION

Call Center Management Website

Business website/platform designed for call-center operations.

- Call management workflows.
- Customer interaction functionality.
- Business-oriented communication tools.
- Call-center operational support.

EXCHANGE

UK-Based E-Commerce / Business Platform

Mobile and mobile-accessories business platform.

- Product listings.
- Mobile device and accessory catalog.
- Customer-facing shopping experience.
- Business/product management functionality.
- Designed for the UK market.

INDEPENDENT / BUSINESS PROJECTS

GRID SOLAR INSTALLATION

Founder / Developer / Technical Lead

Solar installation business and technology project.

- Developed the digital presence and technology roadmap.
- Planned Client, Worker, and Admin management system.
- Customer/project management.
- Worker job assignments.
- Site visits and project tracking.
- Payment and material management.
- Worker expenses.
- Bills and reports.
- Project completion and handover workflows.
- Planned AI chatbot with AI and manual support.
- Explored inverter API integrations and solar-performance dashboards.
- Worked on SEO, social media, Meta advertising, and business documentation.

FUEL DELIVERY & DRIVER MANAGEMENT SYSTEM

- Driver assignment and delivery workflows.
- Pending delivery controls.
- Delivery status management.
- Start/end geolocation.
- Distance calculation.
- Delivery tickets.
- Digital signatures.
- File/image uploads.
- SplitLoad workflows.
- Customer and delivery management.

HOSPITAL RECEIPT DESKTOP APPLICATION

Laravel • XAMPP • Electron

- Desktop-based hospital receipt solution.
- Receipt generation and printing.
- Desktop operational workflows.
- Local printing functionality.
- Laravel-based application backend with desktop integration.

ABUZAR DESKTOP PLATFORM + FOODPANDA INTEGRATION

- Planned Foodpanda developer API integration.
- Online order synchronization.
- Desktop order management.
- Local bill-printing workflow.
- API-to-desktop application integration.

CRM & CUSTOMER MANAGEMENT SYSTEMS

- Developed multiple CRM/business-management platforms.
- Customer management.
- Conditional customer/business fields.
- Business workflows.
- Dashboards.
- Reporting.
- Administration.
- Structured data management.
- Excel/customer data imports.

EXCEL CUSTOMER / DATA IMPORT SYSTEM

- Developed structured Excel import workflows.
- Imported customer/business records into application databases.
- Worked with fields including CNO, company, address, and related records.
- Implemented structured data processing and validation.

TECHNANALYTICA

Independent Project

Independent software/product project included in personal portfolio.

Project details: To be expanded based on the final project documentation.

SUPREME AESTHETIC

Independent Project

Independent software/product project included in personal portfolio.

Project details: To be expanded based on the final project documentation.

AI, RAG & AUTOMATION

- AI/LLM integration into web and SaaS applications.
- Retrieval-Augmented Generation (RAG) systems.
- Knowledge-retrieval workflows.
- AI-assisted business processes.
- AI-powered application features.
- n8n automation workflows.
- Python-based AI workflows.
- AI API and model integrations.
- Connecting AI systems with Laravel, Node.js, databases, and business applications.

CLOUD, DEVOPS & INFRASTRUCTURE

- VPS setup and management.
- GoDaddy hosting and domain management.
- cPanel administration.
- Cloudflare DNS, security, caching, and domain management.
- AWS EC2.
- AWS S3.
- AWS RDS.
- AWS Lambda.
- AWS email services.
- Docker.
- Linux hosting.
- Git/GitHub deployment workflows.
- DNS configuration.
- Laravel production deployment.
- Server troubleshooting.
- Environment configuration.
- Database configuration and optimization.
- Multi-domain hosting and deployment management.

TEAM LEADERSHIP

- Lead development teams and coordinate technical delivery.
- Coordinate development, SEO, content, and design teams.
- Assign technical tasks and monitor progress.
- Perform code reviews.
- Conduct live coding/code checks.
- Mentor junior developers.
- Provide architecture and technology guidance.
- Coordinate cross-functional workflows.
- Support project planning and technical estimation.
- Manage production infrastructure and technical operations.
- Troubleshoot complex application and deployment issues.

PROJECT DOMAINS

SaaS • CRM • HRM • Gaming • Travel • Banking • Logistics • Event Management • Education • E-Commerce • Lead Marketplaces • Music Collaboration • File Transfer • Online Meetings • Luxury Bidding • Water Parks • Solar Installation • Healthcare • SEO Platforms • Business Management • AI/RAG

EDUCATION

Allama Iqbal Open University

Bachelor of Science in Computer Science (BSCS)
Sep 2019 – Jun 2023

Rawalpindi College of Commerce

Intermediate in Computer Science (ICS)
Sep 2017 – Jun 2019

PROFESSIONAL PROFILE

Role: Full-Stack Developer / Team Lead / Technical Lead

Experience: 5+ Years

Primary Stack: Laravel, PHP, Node.js, Express.js, React, MERN

Cloud & DevOps: AWS, VPS, cPanel, GoDaddy, Cloudflare, Docker

Databases: MySQL, MongoDB, Firebase, RDS

AI: LLM, RAG, n8n, Python AI workflows

Leadership: Development, SEO, Content, Design & Technical Operations

Project Scale: Multi-domain website portfolio of approximately 200+ websites plus SaaS, business, and custom software platforms.
